**Coburn Technologies Extends Exclusive
Distributorship Agreement with Huvitz until 2023**

SOUTH WINDSOR, CT – Coburn Technologies, a leading provider of innovative, end-to-end customer solutions to the world’s ophthalmic lens processing industries, announces the extension of their exclusive distributorship agreement with Huvitz Co., Ltd. to the United States market.

Alex Incera, President of Coburn Technologies stated, “In 2011, we announced our exclusive distributorship agreement with Huvitz to market, sell, service and support the portfolio of finishing equipment in the United States. In 2014, we expanded that relationship to include the range of diagnostics equipment, as well. It has been a terrific partnership allowing us to offer the best finishing and diagnostics products in the industry. Today, I am pleased to say we have extended both of these agreements for another five years, until the end of 2023, and I am excited to see how we will grow together.”

Since the partnership between Coburn and Huvitz began (in 2011), the companies have sold over 3,000 finishing and diagnostics systems. This includes edgers, lockers, frame tracers, auto ref-/keratometers, lensmeters, digital refractors, chart projectors and slit lamps.

JJ Kim, General Sales Manager for Huvitz, expressed his thoughts on the partnership as well. “Coburn Technologies is the right partner for Huvitz. Our companies share similar values and together we have built great reputations on quality and performance. Not only have we worked well together to launch a myriad of new products to the United States market, our partnership has grown greatly over the years, and we now collaborate to develop and create new products and technologies to help us become leaders in the optical market.”

For more information and a complete list of finishing and diagnostics products manufactured by Huvitz and available through Coburn Technologies, visit www.coburntechnologies.com, or call 1-800-COBURN-1.
